ITEM 4 – ADVISORY BUSINESS

OWNERSHIP/ADVISORY HISTORY

Ravsten Wealth Management, LLC D/B/A Foxstone Financial (“We”) are registered as an investment adviser in Colorado in January 2017. Christian Ravsten is the firm’s managing member and sole owner. Additional information about Christian Ravsten can be found under Item 19 along with his Supplemental Brochure.

ADVISORY SERVICES OFFERED

INVESTMENT MANAGEMENT

We manage client’s assets by implementing our Freedom 4 investment allocation system. Assets are divided into four quadrants that include a liquidity quadrant (3 to 6 months of living expenses), a retail investments quadrant (our managed investment portfolios), a guaranteed quadrant (consisting of insurance products, which are sold through our separate consulting company please see Item 5 and 10 for more information about the conflicts of interest associated with the sale insurance products), and an alternative quadrant (assets managed by a third party investment adviser). Each quadrant is customized to the client’s risk tolerance and income needs.

The third-party investment advisers used are provided through Charles Schab’s advisor program, and the SEI Private Trust Company’s Managed Account Solution program (“SEI”). We request discretionary authority from the client to select the securities in the client’s account, to execute the transactions and hire or remove any recommended third-party adviser. Please see Item 16 for additional details regarding investment discretion.

Through Charles Schwab we may recommend the services of Institutional Strategists, who are independent investment advisers (“Institutional Strategist”), to manage the client’s account. Our recommendation will depend on the client’s circumstances, goals and objectives, strategy desired, account size, risk tolerance, or other factors. We work with the client to determine which Institutional Strategist may be appropriate. Clients are never obligated to use a recommended Institutional Strategist. The Institutional Strategist will be part of a unified management account platform. The platform gives us access to the services of hundreds of Institutional Strategists whose investment philosophies range from conservative to aggressive.

This platform is designed to match a client’s investment objective with an Institutional Strategist’s investment style. For example, we will recommend active management Institutional Strategist when a client seeks an actively managed portfolio. Clients preferring a passively invested portfolio will be recommended passive Institutional Strategist. The investment styles may also be combined to create a portfolio that is part actively management and part passively managed.

When a client enters into an agreement with us, you will sign the Statement of Investment Selection detailing their initial allocation. As time progresses, we will have discretion to reallocate holdings or make strategic changes.

Prior to recommending an Institutional Strategist we conduct a due diligence review of the available Institutional Strategists available. We consider the following factors during its review:

fees, reputation, performance, financial strength, management, price, reporting capabilities, client's financial situation, client's goals, client's needs, client's risk tolerance and client's investment objectives. After we review it we present the client with one or more recommendations. The client will be given a copy of the Institutional Strategists Form ADV Part 2A. Clients are encouraged to read and understand this disclosure document.

SEI allows us to create either a SEI model mutual fund portfolio, SEI model exchange traded fund portfolio or have a separately managed account that includes our management services and one of SEI's model portfolios. With some of the model portfolio that client's account will be managed by one or more third party investment advisers ("Third Party Advisers"). All client portfolios are based on the client's current financial situation, investment goals, risk tolerance, financial needs and objectives.

We will review SEI's Third Party Advisers prior to engaging their services in a client's portfolio. We consider the following factors during its review: fees, reputation, performance, financial strength, management, price, reporting capabilities, client's financial situation, client's goals, client's needs, and client's investment objectives. We will have the ability to hire and terminate the third-party adviser relationship.

When utilizing the services of a Third-Party Adviser, clients will be given a copy of its Form ADV Part 2A. Clients are encouraged to read and understand this disclosure document. We will not refer a client to a Third-Party Advisor unless it is registered or exempt from registration as an investment adviser in the client's state of residence. Also, the client should refer to the Third-Party Adviser's ADV Part 2A on whether the client is allowed to impose restrictions on the type of investments used in their accounts.

With the client's permission, we may invest a small portion of an account in digital assets, also known as cryptocurrencies. Please see Item 8 for additional disclosures on digital assets.

FINANCIAL PLANNING

Our comprehensive financial planning services involve a review of your financial situation, goals and risk tolerance. Through a series of personal interviews and/or the use of questionnaires we will collect pertinent data, identify goals, objectives, financial problems, and potential solutions. With this information, we tailor your financial plan and advice we give to the client. Our advice may cover any of the following topics: Cash flow and Debt Management, college savings, estate planning, financial goals, insurance, investment analysis, retirement planning, risk management, tax planning strategies or other needs as identified during our meeting with you. Additionally, when requested by the client, we will conduct due diligence on alternative investments and other tax reduction strategies. Our analysis typically includes a review of the offeror business, the tax implications, income rate (if applicable), and other investment specific issues. The client will receive a written financial plan following our meetings.

Financial consulting services are also offered where we focus on a single topic or multiple topics listed above as identified in our meetings with you. The chosen topics are written in the financial planning and consulting agreement. Typically, we meet with you to discuss your questions, conduct research on the chosen topics and present the findings through a second meeting.

TAILORED SERVICES

We offer the same suite of services to all of our clients. You may impose restrictions on investing in certain securities or types of securities. All restrictions must be presented in writing.

WRAP PROGRAM

We do not sponsor a wrap program. However, we may hire sub-advisors who sponsor or act as portfolio managers to a wrap fee program. Under a wrap fee program, advisory services and transaction services are provided for one fee. This is different from traditional management programs whereby services are provided for a fee, but transaction services are billed separately on a per-transaction basis. From a management perspective, there is no fundamental difference in the way wrap fee accounts are managed versus traditional management accounts other than the way in which you pay for transaction services.

CLIENT ASSETS MANAGED

As of March 20, 2024, we manage \$53,330,671 in client assets on a discretionary basis and \$0 in client assets on a non-discretionary basis.

ITEM 5 – FEES AND COMPENSATION

INVESTMENT MANAGEMENT SERVICES

The client will be charged an annual management fee based on the assets under management in the client's accounts. Our annual management fee ranges between 0.50% to 1.25%. The annual management fee is negotiable based on the size of the account; the client may household or aggregate account values to negotiate a lower fee.

When we recommend Institutional Strategists through Charles Schwab, the maximum platform fee is 0.50%. The total maximum annual management fee charged to the client will be 1.75%. We will ensure that the total annual management fee does not exceed 2% of the assets under management.

When we recommend SEI Investments, the annual management fee for SEI ranges between 0.30% to 1.25%. The total maximum annual management fee charged to the client is up to 2.50%. The fees may have an adverse effect on client returns as the total annual management fee may exceed 2% of the assets under management. The client may obtain the same or similar services from other adviser for a lower percentage of assets under management.

The Charles Schwab Platform and SEI will calculate and collect the total management fee monthly, in arrears, based on the average daily balance. The total management fees will be disclosure to the client in the investment management agreement. You will be asked to authorize Charles Schwab and SEI to automatically deduct the management fees directly from the client's account and distribute to us our portion of the annual management fee. This authorization may be canceled at any time.

The management fees are exclusive of brokerage commissions, platform fees, transaction fees, and other related costs and expenses that are incurred by the client. Clients may incur certain charges imposed by custodians, brokers, third party investment and other third parties such as fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Mutual funds also charge internal management fees, which are disclosed in a fund's prospectus. Such charges, fees and commissions are exclusive of and in addition to our annual management fee.

FINANCIAL PLANNING SERVICES

Comprehensive financial planning services are offered on a fixed fee basis up to \$5,000. The fixed fee varies depending on the nature and complexity of the client's individual circumstances and the number of areas covered by the written financial plan. Your financial planning and consulting agreement will show the client what they will be charged to complete the scope of services as defined in the agreement. We will collect half of the agreed upon fee upon engagement and the second half at the delivery of the written financial plan.

Consulting services are offered at an hourly rate of \$250 per hour. At the beginning of engagement, we will provide you with a written estimate of the number of hours we believe the services will take. We will track the time we spend collecting the client's information, analyzing and researching the chosen topics, and time presenting the findings to the client. We will collect half of the estimated fee upon engagement and the remaining balance at our final meeting.

Financial planning fees can be paid by either check or via digital vendor.

TERMINATION

A client may terminate any services for any reason within the first five (5) business days after signing the contract, without any cost or penalty for full refund. Thereafter, an agreement may be terminated at any time by either party. To cancel the agreement, the client must notify us in writing to Foxstone Financial, 7200 S. Alton Way, Suite A-250, Centennial, CO 80112. Upon termination, the fee will be prorated based on the number of days the account was open during the final billing period.

OTHER SECURITIES COMPENSATION

As established in Item 10.D – Other Industry Affiliations, earning commissions for the sale of insurance products create a conflict of interest for the firm. The commissions give a financial incentive to recommend and sell insurance products to clients. We attempt to mitigate the conflict of interest to the best of our ability by placing the client's interest ahead of our own and through the implementation of policies and procedures that address the conflict. Additionally, the client is informed that they always has the right to choose whether to act on the recommendation and that they have the right to purchase any recommended insurance products through any licensed agent not affiliated with the firm.

Comparable Services Disclosure

Clients should note that lower fees for comparable services may be available from other sources.

Retirement Rollover Conflicts of Interest

When we recommend that a client rollover a retirement account for us to manage, this creates a financial incentive because we charge a fee for our services. We attempt to mitigate the conflict of interest by acting in the client's best interest and applying an impartial conduct standard to all rollovers. Please note that the client is not under any obligation to roll over a retirement account to an account managed by us.

ITEM 6 – PERFORMANCE-BASED FEES AND SIDE BY SIDE MANAGEMENT

We do not charge any performance-based fees (fees based on a share of capital gains on or capital appreciation of the assets of a client) or provide side by side management.

ITEM 7 – TYPES OF CLIENTS

We offer our services to individuals, high net worth individuals, pension and profit-sharing plans, and corporations or other business entities. We do not require a minimum account size; however, some institutional managers may require a minimum account balance of \$50,000.

ITEM 8 – METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

METHODS OF ANALYSIS AND INVESTMENT STRATEGIES

For the liquidity quadrant we set aside between three- and six-months' worth of the client's living expenses. These assets are typically invested in a money market fund or savings account. The idea is to keep these assets as liquid as possible in case of a financial emergency. The risk associated with these investments is that they don't pay very high interest rates.

When we purchase securities in the retail quadrant, we analyze them using fundamental analysis. Fundamental analysis is a technique that attempts to determine a security's value by focusing on underlying factors that affect a company's *actual* business and its future prospects. The analysis is performed on historical and present data. On a broader scope, one can perform fundamental analysis on industries or the economy as a whole. The term refers to the analysis of the economic well-being of a financial entity as opposed to only its price movements. The risk associated with fundamental analysis is that despite that appearance that a security is undervalued, it may not rise in value as predicted.

We purchase securities with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year. The risk associated with using a long-term purchase strategy is that it generally assumes the financial markets will go up in the long-term, which may not be the case. There is also the risk that the segment of the market that the client is invested in or perhaps just that client's particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

For the guaranteed quadrant, we recommend the purchase of an insurance product such as a fixed annuity or fixed indexed annuity. The guaranteed quadrant consists of assets that the client

does not need to be held for five or more years. The risks associated with an annuity purchase that has early withdrawals may be subject to a surrender charge. Additionally, distributions prior to age 59 ½ may be subject to a 10% tax penalty on any accumulated interest.

With the alternative quadrant, we attempt to match each client with a sub-adviser whose investment strategies and methods of analysis meet his or her risk tolerance, goals, and objectives. We will discuss the sub-adviser's investment strategies with the client when we make the recommendation. We will also give the client their ADV Part 2A so the client can review Item 8.

INVESTMENT RISKS

All investment programs have certain risks that are borne by the client and **investing in securities involves risk of loss that clients should be prepared to bear**. Our goal is to reduce the risk of loss, but not at the expense of portfolio growth. Recommended investment strategies seek to balance risks and rewards to achieve investment objectives. To manage risk, we rebalance model portfolios on an as needed basis to bring the asset allocations back to their intended balances. The client should feel free to ask questions about risks that he or she does not understand; we would be pleased to discuss them.

We strive to render its best judgment on behalf of our clients. Still, we cannot assure or guarantee clients that investments will be profitable or assure that no losses will occur in an investment portfolio. Past performance is an important consideration with respect to any investment or investment adviser but is not a reliable predictor of future performance. We continuously strive to provide outstanding long-term investment performance, but many economic and market variables beyond its control can affect the performance of an investment portfolio.

RECOMMENDED SECURITIES

We recommend and use several types of securities in client portfolios, including but not limited to, stocks, bonds, mutual funds, exchange-traded funds, and cryptocurrency. An investment could lose money over short or even long periods. A client should expect his/her account value and returns to fluctuate within a wide range, like the fluctuations of the overall stock and bond markets. A client's account performance could be hurt by:

- **Principal Risk:** There is no guarantee that a stock will go up in value. A stock's price fluctuates, which means a client could lose money by investing in an equity security.
- **Stock Market Risk:** The chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising stock prices and periods of falling stock prices.
- **Interest Rate Risk:** Interest rate risk is the chance that an unexpected change in interest rates will negatively affect the value of an investment. For example, the possibility of a reduction in the value of a security, especially a bond, resulting from a rise in interest rates.
- **Mutual Fund Manager Risk:** The chance that the proportions allocated to the various mutual funds will cause the client's account to underperform relevant to benchmarks or other accounts with a similar investment objective.

- **International Investing Risk:** Investing in the securities of non-U.S. companies involves special risks not typically associated with investing in U.S. companies. Foreign securities tend to be more volatile and less liquid than investments in U.S. securities, and may lose value because of adverse political, social or economic developments overseas or due to changes in the exchange rates between foreign currencies and the U.S. dollar. In addition, foreign investments are subject to settlement practices, and regulatory and financial reporting standards, that differ from those of the U.S.
- **Investment style Risk.** Different investment styles tend to shift in and out of favor, depending on market conditions and investor sentiment. Growth stocks tend to be more volatile than value stocks and their prices usually fluctuate more dramatically than the overall stock market. A stock with growth characteristics can have sharp price declines due to decreases in current or expected earnings and may lack dividends that can help cushion its share price in a declining market.
- **Non-Indexed ETF Risk:** Client accounts may invest in exchanged traded funds that are not correlated to a market index. These ETFs are generally less liquid and may trade at a discount because of they have a large buy-sell spread.
- **Terrorism Risk:** The chance that stock domestic and international stock prices will decline due to a terrorist event.
- **Political Risk:** The chance that a change in government may affect stock prices of domestic or international stocks.
- **Natural Risks:** The chance that a natural catastrophe (earthquakes, hurricanes, etc.) may affect stock prices of domestic or international stocks.
- **Liquidity Risk:** Liquidity risk exist when particular investments are difficult to purchase or sell, possibly preventing the ability to sell such illiquid securities at an advantageous time or price, or possibly requiring the client to dispose of other investments at unfavorable times or prices in order to satisfy its obligations.
- **Third Party Investment Advisers Risks:** Risks associated with using a Third-Party Investment Adviser is that the adviser's investment strategy may not always align with a client's investment objectives. Since we do not control the Third-Party Adviser's daily business and compliance operations, we may be unaware of the lack of internal controls necessary to prevent business, regulatory, or reputation deficiencies.
- **Fixed Annuity and Fixed Index Annuity Risks:** Fixed index annuities are insurance contracts that, depending on the contract, may offer a guaranteed annual interest rate and some participation growth, if any, of a stock market index. Such contracts have substantial variation in terms, costs of guarantees and features and may cap participation or returns in significant ways. Any guarantees offered are backed by the financial strength of the insurance company, not an outside entity. Clients are cautioned to carefully review an index annuity for its features, costs, risks, and how the variables are calculated. Contract guarantees backed by the financial strength of the issuing insurance company. Other restrictions apply.

- **Alternatives Risk:** Non-traded REITs, business development companies, limited partnerships, and direct alternatives are subject to various risks such as liquidity and property devaluation based on adverse economic and real estate market conditions and may not be suitable for all investors. A prospectus that discloses all risks, fees, and expenses may be obtained from us. Investors considering an investment strategy utilizing alternative investments should understand that alternative investments are generally considered speculative in nature and may involve a high degree of risk, particularly if concentrating investments in one or few alternative investments.

KEY RISKS ASSOCIATED WITH DIGITAL ASSETS AND BLOCKCHAIN

- **Risks Associated with Blockchain Investments:** Blockchain-based financial transactions are entirely novel from a legal, tax, and regulatory perspective, and they create uncertainties, and therefore risks, as to compliance with a wide variety of laws, including those relating to the offer, sale, and trading of securities, commodities, derivatives, and other financial instruments; anti-money laundering; currency regulation; regulation of banks and other financial institutions; and taxes, tax withholding, and tax reporting. Participants in the blockchain marketplace are expected to face increasing scrutiny from regulators and tax authorities, both in the United States and abroad, particularly if, as blockchain markets grow, incidents of misconduct, including fraud and theft, involving blockchain-based transactions also increase.
- **Risks Associated with Digital Assets:** The investment characteristics of “Digital Assets” (e.g., a digital representation of value that will or can be digitally traded) generally differ from those of traditional fiat currencies, commodities or securities. Importantly, Digital Assets are typically not backed by a central bank or a national, supra-national or quasi-national organization, any hard assets, human capital, or other form of credit. Rather, Digital Assets are market-based: a Digital Asset’s value is determined by (and fluctuates often, according to) supply and demand factors, the number of merchants that accept it, and the value that various market participants place on it through their mutual agreement, barter or transactions. The term “Digital Assets” includes, without limitation, virtual currencies, digital currencies, crypto assets, cryptocurrencies, digital coins and tokens.
- **Volatility Risks Relating to Digital Assets:** Digital Assets are a new and relatively untested product. Perhaps in part because of their youth, Digital Assets have experienced sharp fluctuations in value. If such volatility continues, it may have an adverse effect on the willingness of parties, other than speculators, to receive Digital Assets in a transaction. There is considerable uncertainty about the long-term viability of Digital Assets, which could be affected by a variety of factors, including many market-based factors such as economic growth, inflation, and others. In addition, the success of Digital Assets will depend on the long-term utility and economic viability of blockchain and other new technologies related to Digital Assets. Due in part to these uncertainties, prices of Digital Assets remain volatile, and Digital Assets may be hard to sell. Some market participants believe that there is a Digital Asset speculative bubble that could

burst, leading to a dramatic fall in prices. If such a collapse occurs, the net asset value of the investments in Digital Assets would also fall, and the resulting loss of confidence could lead to a lack of interest in and eventual demise of the Digital Asset. Prices of Digital Assets have fluctuated widely for a variety of reasons including uncertainties in government regulation and may continue to experience significant price fluctuations. Several factors may affect the price of the Digital Assets, including, without limitation:

- Total Digital Assets in existence and global Digital Asset supply and demand;
- Investors' expectations with respect to the rate of inflation of fiat currencies, currency exchange rates, or interest rates;
- Fiat currency withdrawal/deposit policies, liquidity levels, interruptions in service from or failure of Digital Asset Exchanges (as defined below);
- Cyber theft of Digital Assets from Digital Asset wallet providers, or news of such theft from such providers, or theft from individual Digital Asset wallets;
- Investment and trading activities of hedge funds and other large Digital Asset investors;
- Monetary policies of governments, trade restrictions, currency devaluations and revaluations;
- Regulatory measures, if any, that restrict or facilitate the ability to buy, sell or hold the Digital Assets or use the Digital Assets as a form of payment;
- Availability and popularity of businesses that provide Digital Asset-related services;
- Maintenance and development of the open-source software protocol of the Digital Asset network;
- Increased competition from other forms of Digital Assets or payments services; and
- Global or regional political, economic or financial events and uncertainty.

We do not control any of these factors, and therefore may not be able to control the ability of any Digital Assets to retain or maintain value. If the Digital Asset market continues to be subject to high volatility, your investment may experience losses as the value of the Digital Assets declines. Even if your investment is able to hold Digital Assets long-term, the investment may never generate profits.

- **Cybersecurity Risks Related to Digital Assets:** Any “digital” investments may be more susceptible to theft or loss from cyberattacks, hacking, or technological failures. Any such digital investments will also be subject to the risks inherent to the blockchain marketplace described herein. These risks could be significant, and the nature of Digital Assets may lead to an increased risk of fraud or cyberattack. Hackers or other malicious groups or organizations may attempt to interfere with Digital Assets in a variety of ways, including, but not limited to, smurfing, spoofing, social engineering, phishing emails, man-in-the-middle, phone hijacking, ransomware, malware, denial-of-service, consensus-based, Sybil and other attacks. Digital Assets may be permanently lost because of, among other things, unsecure local storage sites, malware attacks and data loss (for example, through destruction of the physical media housing a Digital Asset).

- **Legal and Regulatory Risks Associated with Digital Assets:** The regulation of Digital Assets is in its infancy, and the regulatory status of Digital Assets, as well as the regulatory status of partnerships or funds that invest in Digital Assets, is unclear or unsettled in many jurisdictions. Regulators are concerned, among other things, that such a large unregulated and decentralized, peer-to-peer economy that crosses national borders could potentially enable criminals to evade taxes and launder money. Legislative and regulatory changes or actions at the state, federal, foreign or international level may adversely affect the use, transfer, exchange, and value of Digital Assets. It is difficult to predict how or whether regulatory agencies may apply existing or new regulation with respect to such technology and its applications, including the use of Digital Assets as an asset class in which to invest. It is also difficult to predict how or whether legislatures or regulatory agencies may implement changes to laws and regulations affecting distributed ledger technology and its applications, including Digital Assets. As the Digital Asset market has grown in popularity and size, the U.S. Congress and a number of U.S. federal and state agencies have begun to develop regulations governing the Digital Asset market. Federal regulators in the United States, including without limitation the Securities and Exchange Commission, the Commodity Futures Trading Commission, the Financial Crimes Enforcement Network, the Office of Foreign Assets Control and the IRS, have released interpretive guidance on Digital Assets and Digital Asset businesses, but there remain numerous questions about the application of U.S. federal regulations to Digital Assets, Digital Asset businesses and Digital Asset Offerings.
- **Risks Associated with Digital Asset Exchanges:** Digital Asset exchanges, alternative trading systems and other alternative trading venues (collectively, “Digital Asset Exchanges”) allow users to buy or sell Digital Assets for fiat currency or transfer Digital Assets to other wallets. Digital Asset Exchanges on which Digital Assets trade are relatively new and, in many cases, largely unregulated and, therefore, may be more exposed to fraud and failure than established, regulated exchanges for other assets. Each of the following factors and others may reduce investor confidence in Digital Assets, increase pricing volatility in the Digital Asset market or result in the closure or temporary shutdown of one or more Digital Asset Exchanges: operational limits; regulatory changes; market manipulation and fraud; cybersecurity attacks; and other factors increasing volatility. A number of Digital Asset Exchanges have previously been closed due to some of these factors, and, in many instances, the customers of the Digital Asset Exchange were not compensated or made whole for partial or complete losses of account balances. Any one of these factors may increase volatility in the Digital Asset market and have adverse consequences on an investment in the Digital Assets.
- **Volatility Risks Relating to Digital Asset Exchanges:** Digital Asset prices on Digital Asset Exchanges have been volatile, subject to influence by many factors including the levels of liquidity on Digital Asset Exchanges and in the Digital Asset market generally. Such disruptions limit the liquidity of Digital Assets on the affected Digital Asset Exchange, tend to result in higher volatility and reduced confidence in the broader Digital Asset market. Pricing on Digital Asset Exchanges may also be impacted by policies, regulations,

or interruptions in the ability to transfer fiat currency into or out of larger Digital Asset Exchanges.

ITEM 9 – DISCIPLINARY INFORMATION

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of each supervised person providing investment advice. We do not have information applicable to this item.

ITEM 10 – OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

BROKER DEALER AFFILIATION

We are not affiliated with a broker-dealer.

FUTURES/COMMODITIES FIRM AFFILIATION

Neither we nor our management persons are registered, or have an application pending to register as a futures commissions merchant, commodity merchant, commodity pool operator, a commodity trading advisor, or an associated person of the foregoing.

OTHER INDUSTRY AFFILIATIONS

Our owner, Mr. Ravsten, is an insurance agent and recommends the purchase of insurance to our clients. This other business activity pays Mr. Ravsten commissions that are separate from the fees described above. This is a conflict of interest because the commissions give him a financial incentive to recommend and sell clients the insurance products. However, Mr. Ravsten attempts to mitigate any conflicts of interest to the best of his ability by acting in the client's best interests through his fiduciary duty. The client is also informed that he or she always have the right to choose whether to act on the recommendation and he or she have the right to purchase recommended insurance through any licensed insurance agent.

We do not have any relationship or arrangements with any of the following: a broker-dealer, municipal securities dealer, or government securities dealer or broker; an investment company or other pooled investment vehicle (e.g. mutual fund, private fund, etc.); another investment adviser or financial planner; a futures commission merchant, commodity pool operator, or commodity trading advisor; a banking or thrift institution; an accountant or account firm; a lawyer or law firm; a pension consultant; a real estate broker or dealer; or a sponsor or syndicator of limited partnerships.

RECOMMENDATION AND MONITORING OF THIRD-PARTY INVESTMENT ADVISERS.

We recommend the services of Third-Party Investments through Charles Schwab and SEI Platforms. This information can be found under Items 4 and 5. We will ensure that the Third-Party Advisers are properly registered or exempt from registration in the client's state of residence prior to making any recommendations. We are not affiliated with Charles Schwab & Co., Inc. or SEI Investments Management Corporation. As disclosed in Item 5, we charge a separate fee from Charles Schwab institutional strategist and SEI. This does not create a conflict of interest as we are not compensated by the either party.

ITEM 11 – CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTION AND PERSONAL TRADING

DESCRIPTION

Our Code of Ethics establishes ideals for ethical conduct based upon fundamental principles of openness, integrity, honesty, and trust. We will provide a copy of our Code of Ethics to any client or prospective client upon request.

Our Code of Ethics covers all supervised persons and it describes our high standard of business conduct and fiduciary duty to our clients. The Code of Ethics includes, among other things, provisions relating to the confidentiality of client information, a prohibition on insider trading, a prohibition on rumor mongering, restrictions on the acceptance of significant gifts and the reporting of certain gifts and business entertainment items, and personal securities trading procedures. All supervised persons must acknowledge the terms of the Code of Ethics annually or as amended.

MATERIAL INTEREST IN SECURITIES

Neither we nor our related persons recommend to client's securities in which we or a related person has a material financial interest.

INVESTING IN OR RECOMMENDING THE SAME SECURITIES

Our owner may buy or sell for his own account the same securities at or about the same time that he recommends those securities to the client or purchase them for client's accounts. A conflict of interest may exist because they can trade ahead of client trades. We mitigate any conflict of interest in two ways. First, our Code of Ethics requires employees to: 1) report personal securities transactions on at least a quarterly basis, and 2) provide us with a detailed summary of certain holdings (both initially upon commencement of employment and quarterly thereafter) in which employees have a direct or indirect beneficial interest. The reports are reviewed to ensure we do not trade ahead of the client's accounts. Second, we require that the client transactions be placed ahead of our associates' personal trades or our associates can place personal trades as part of a block trade (Please see Item 12.B for details on our block trading practices). The records of all associates' personal and trading activities are reviewed and made available to regulators to review on the premises.

ITEM 12 – BROKERAGE PRACTICES

RECOMMENDATION CRITERIA

We recommend two custodians, SEI Private Trust Company ("SEI") and Charles Schwab & Co., Inc. ("Schwab") both registered broker dealers and members of FINRA/SPIC. The recommendation of SEI is based upon SEI's proven integrity and financial responsibility of the firm, access to Third-Party Advisers, and the best execution of orders at reasonable commission rates. We are independently owned and operated and not affiliated with SEI or Schwab. They will hold your assets in a brokerage account and buy and sell securities when we instruct them to. While we recommend that the client uses SEI or Schwab as the custodian/broker, the client

will ultimately decide to do so and open an account with recommended custodian by entering into an account agreement directly with them.

NOTE: Clients may be able to obtain lower commissions and fees from other brokers/custodians, and the value of products, research and services given to the us is not a factor in determining the selection of broker/dealers or the reasonableness of their commissions.

RESEARCH AND SOFT DOLLARS

“Soft dollars” are defined as a form of payment investment firms can use to pay for goods and services such as news subscriptions or research. When an investment firm gives its business to a particular brokerage firm, the brokerage firm in return can agree to use some of its revenue to pay for these types of services. We do not receive any soft dollars or economic benefits.

BROKERAGE FOR CLIENT REFERRALS

We do not receive client referrals or any other incentive from any broker-dealer or custodian.

DIRECTED BROKERAGE

We do not allow Directed Brokerage. Directing brokerage may cost clients more money. In a directed brokerage account, the client may pay higher brokerage commissions because we may not be able to aggregate orders to reduce transactions costs, or the client may receive less favorable prices.

TRADE AGGREGATION

We may aggregate transactions in equity and fixed income securities for a client with other clients to improve the quality of execution. When transactions are so aggregated, the actual prices applicable to the aggregated transactions will be averaged, and the client account will be deemed to have purchased or sold its proportionate share of the securities involved at the average price obtained. We may determine not to aggregate transactions, for example, based on the size of the trades, the number of client accounts, the timing of the trades, the liquidity of the securities and the discretionary or non-discretionary nature of the trades. If we do not aggregate orders, some clients purchasing securities around the same time may receive a less favorable price than other clients. This means that this practice of not aggregating may cost clients more money.

ITEM 13 – REVIEW OF ACCOUNTS

PERIODIC REVIEWS

Our owner, Mr. Ravsten, conducts quarterly reviews of the securities held in the client accounts and accounts held with Third-Party Investment Advisers. During the review, he will monitor the performance of individual securities and determine whether or not rebalancing is necessary. He also attempts to meet with each client annually either in person or by telephone.

Comprehensive financial planning clients may receive ongoing support at their request at no additional cost.

OTHER REVIEWS

Additional reviews are conducted periodically depending on market conditions, economic or political events, or by changes in a client's financial situation (such as retirement, termination of employment, physical move or inheritance).

REPORTS

At the beginning of the relationship, clients will receive a written retirement analysis which is provided by an affiliated third-party. When we manage the client's portfolio or recommend the services of a Third-Party Adviser, you will receive at least quarterly account statements from the account's custodian. Third-Party Adviser may send their own quarterly statements in addition to the custodian's statement. We urge clients to carefully review such statements.

ITEM 14 – CLIENT REFERRALS AND OTHER COMPENSATION

OTHER COMPENSATION

We may receive a non-economic benefit from Schwab in the form of the support products and services they make available to us and other independent advisers whose clients maintain their accounts at Schwab. The availability to use Schwab's products and services is not based on us giving particular investment advice, such as buying particular securities for the client.

Additionally, please see Item 10 for details on other compensation received through the sale of insurance.

CLIENT REFERRALS

We are aware of the special considerations promulgated pursuant to SEC Rule 206(4)-1 of the Investment Adviser Act of 1940 (the "Act"), to which our domicile state, Colorado, abides. As such, appropriate disclosures describing the terms and fee arrangement between us and the promoter will be made to clients, all required written records will be maintained, and all applicable laws and regulations will be observed. A Promoter Disclosure Document will be provided to each client, as required under the Act, and we will retain the client's signed acknowledgement of receiving their Form ADV Part 2A and the Promoter Disclosure Document.

ITEM 15 – CUSTODY

All client funds, securities and accounts are held at third-party custodians, Charles Schwab and SEI. We do not take possession of a client's funds, securities or accounts. However, the client will be asked to authorize us with the ability to deduct our annual management fee directly from the client's account. This authorization will apply to the annual management fee only. When deducting the management fee, we will send an invoice to each client and his or her custodian, showing the management fee to be debited, how the management fee was calculated, the time period the management fee covers and the account balance on which the management fee was calculated. The client may terminate our ability to directly deduct the annual management fee by notifying us, SEI or Schwab at the address or telephone number shown on the invoice. In addition to this invoice, the custodian will also send a monthly account statement, indicating the amount of management fees withdrawn from the client's account. We urge clients to carefully review their account statements and notify us of any discrepancies as soon as possible.

ITEM 16 – INVESTMENT DISCRETION

We offer discretionary investment management services. In order to grant us discretionary power over the account, the client must sign the investment management agreement. Our investment management agreement contains a limited power of attorney that allows us to select the security, the amount, and the time of the purchase or sale in the client's account. It also allows us to place each such trade without the client's prior approval. In addition to our investment management agreement, the client's custodian may request the client to sign the custodian's limited power of attorney. This varies with each custodian. We discuss all limited powers of attorney with the client prior to their execution. In all cases, however, such discretion is to be exercised in a manner consistent with the stated investment objectives for the client account. The client will have the ability place reasonable restrictions on the types of investments that may be purchased in your account.

The client may place reasonable limitations on the discretionary power granted to us or the Third-Party Adviser as long as the limitations are set forth or included as an attachment in the investment management agreement.

ITEM 17 – VOTING CLIENT SECURITIES

We do not vote proxy votes for any client. All proxy materials are mailed or emailed directly to the client from the custodian. Any proxy materials received by us will be forwarded to clients for response and voting. In the event the client has a question about a proxy solicitation, the client should feel free to contact us.

ITEM 18 – FINANCIAL INFORMATION

BALANCE SHEET

We do not require or solicit prepayment of more than \$500 in fees per client, six months or more in advance. Therefore, we are not required to provide a balance sheet.

FINANCIAL CONDITION

We are required in this Item to provide you with certain financial information or disclosures about our financial condition if we have a financial commitment that impairs our ability to service you. We do not have a financial commitment that impairs our ability to service our clients.

BANKRUPTCY

We have not been the subject of a bankruptcy proceeding.

ITEM 19 – REQUIREMENTS FOR STATE-REGISTERED ADVISERS

We have one principal executive officer Christian Ravsten, ("Mr. Ravsten"). Mr. Ravsten biographical information is provided in the attached Brochure Supplement document.

Mr. Ravsten is required to disclose additional information if he has other business activities. He is an independent insurance agent and an independent contractor for Retirement Planning Resources and may receive commissions for the sale of insurance products. This activity, time spent on this activity, and any conflicts of interest associated therewith are discussed in Item 10

above and/or his brochure supplement. He is also co-owner of Catch Wind, LLC, a green energy distribution company and a partner of Lux Financial.

Mr. Ravsten is also required to disclose additional information if he receives performance-based fees. He does not receive performance-based fees.

Finally, Mr. Ravsten must disclose if he has any relationship or arrangement with an issuer of securities, or was ever found liable in an arbitration, civil, self-regulatory organization or administrative proceeding. Mr. Ravsten has no information to report on these topics because none of these apply to him.
